PARKING & ENFORCEMENT MANAGEMENT

GETTING STARTED ·

PROPERTY MANAGER

Welcome. Here's how to run your **property, day to day.**

You run the day-to-day for the properties assigned to you — approving residents and vehicles, managing spaces, issuing visitor passes, and checking whether a plate belongs. Here's where to start.

START HERE

1

Sign in

Your portal opens to the properties assigned to you. Everything you do is scoped to those properties — you won't see anyone else's.

[Signup & first login →](#)

2

Check your queue

DO THIS FIRST

Pending items need your call: **resident registrations, vehicle approvals, and space requests**. Approve or decline — the resident sees the outcome in their own portal.

[Resident management →](#)

3

Look up a plate

Your fastest tool. Type any plate and see its status: **green** (registered resident), **gold** (active visitor pass), **amber** (under review), or **red** (not authorized). Read-only — it never tows.

[PM overview →](#)

4

Manage spaces

Assign and track **reserved spaces**. When a resident requests one, it lands in your queue — you approve by assigning a space.

[Spaces & reserved parking →](#)

5

Issue visitor passes

Create a pass for a guest, or let residents issue their own. Passes **auto-expire**, so there's nothing to cancel.

WHAT YOU'LL DO MOST

- ◆ Approve or decline residents & vehicles — the daily queue
- ◆ Issue and review visitor passes
- ◆ Review & respond to disputes
- ◆ Assign & manage reserved spaces
- ◆ Look up plates — is this vehicle authorized?
- ◆ Watch Insights — activity at your properties

GOOD TO KNOW

Property-scoped

You only see and manage the properties assigned to you — nothing from other properties or companies.

Lookups are read-only

Plate Lookup shows authorization status. It never issues a citation or tow — the next step is always your decision.

Everything's tracked

Approvals, passes, and space assignments are all logged, so there's always a record.

Need help? Contact your **company administrator** — they're your first point of contact. · [All guides →](#)
