PARKING & ENFORCEMENT MANAGEMENT

GETTING STARTED

RESIDENT

Welcome. Let's get your **vehicles** registered.

Your resident portal is where you register your vehicles, invite guests, and manage your parking — all in one place. Here's how to get set up.

GETTING SET UP

1

Register your account

Scan your property's **QR code** or use the link from your property manager, then verify your email.

[Resident self-registration →](#)

2

Add your vehicle **START HERE**

Enter your **plate, make, model, and color**. Your property manager approves it — you'll see the status change to **approved** in your portal.

[Adding vehicles →](#)

3

Check your status

Each vehicle shows **pending, approved, or declined** right in your portal. If something's declined, you'll see the reason.

4

Invite a guest

Issue a **visitor pass** so your guest can park without being towed. Passes auto-expire — nothing to cancel.

[Visitor passes →](#)

5

Request a space

If your property offers **reserved spaces**, request one. Your manager assigns it and you'll see it in your portal.

[Spaces & reserved parking →](#)

WHAT YOU'LL DO MOST

- ◆ Add or update your vehicles — color, make, model
- ◆ Check approval status — pending / approved / declined
- ◆ Mark updates as read — when something's approved
- ◆ Issue visitor passes for guests
- ◆ Request or view your reserved space

GOOD TO KNOW

You're notified in-portal

When a manager approves or declines something, it shows in your portal with a 'mark as read' — no email to dig through.

Some details are locked

You can edit your vehicle's color, make, and model. Your plate and unit are set by your property — ask your manager to change those.

Guests park on passes

A visitor pass is how a guest parks without being towed. Issue one before they arrive.

Questions? Contact your **property manager** or leasing office. · [All guides →](#)
