

SHIELDMYLOT

PARKING & ENFORCEMENT MANAGEMENT

GETTING STARTED ·

COMPANY ADMIN

Welcome. Let's get your operation **up and running.**

You're the account owner. You set up your company — properties, your team, and billing — and everyone else works within what you build. Here's the whole setup in about five minutes.

YOUR FIRST 5 MINUTES

1

Sign in

You'll land on your **Company Admin portal**, starting on the Overview. A new account starts empty — that's expected. You're about to fill it in.

[Signup & first login →](#)

2

Upload your logo

MAKE IT YOURS

Click your logo in the top bar and upload a square image. It appears on your **tow tickets** and across your team's portals — your branding on every document your operation produces.

3

Add your properties

Go to **Properties → Add Property**. For each enforcement property, upload your **towing authorization document** and its expiration date. Your team can only work the properties you add.

[Adding properties →](#)

4

Add your team

Go to **People → Add User**. Add your **managers**, **leasing agents**, and **drivers**. Each gets a login scoped to what they need.

[Account setup →](#)

5

Review your plan

The **Plan & Billing** strip up top shows your tier, properties, and cost. Use **Manage billing in Stripe** to update payment details or view invoices.

[Billing & tier changes →](#)

WHAT YOU'LL DO MOST

- ◆ Keep properties & people current — as your operation changes
- ◆ Review Insights — violations, aging, activity
- ◆ Review enforcement Activity — tow tickets (Enforcement / Legacy)
- ◆ Manage billing — via the Stripe portal
- ◆ Set team permissions — e.g. ticket regeneration per driver
- ◆ Manage storage partners — (Enforcement / Legacy)

WHAT YOU SEE DEPENDS ON YOUR PLAN

PM-Only

Properties, people, and property-management tools — residents, visitor passes, space management. No tow tickets.

Enforcement-Only

Properties, people, storage partners, and enforcement Activity — violations and tow tickets.

Legacy

Everything — full enforcement plus the complete property-management toolset.
